Your data stays on your machine // No subscriptions // No cloud

// OVERVIEW

Your Personal Trading Intelligence System

A complete desktop trading OS that combines AI agents, live market scanning, and professional performance tracking — all running locally on your computer. No subscriptions. No cloud. Your data stays yours.

01

6 AI-POWERED AGENTS

Scout, WhatsHot, Technicals, CEO, Risk, and Stats work together — scanning 200+ stocks every hour during market hours using the 150 SMA system.

02

LIVE MARKET DATA

Real-time prices, Fear & Greed index, BTC correlation, and sector momentum — all in one dashboard. Prices refresh every 60 seconds.

03

ELO PERFORMANCE RANK

Your trading skill tracked like a chess rating. Calibrated from your trade history, then updated with every closed position.

04

TELEGRAM ALERTS

Stop hits, target reached, approaching stop (3%), and approaching target (5%) — sent directly to your phone every hour.

200+

Stocks Scanned

24/7

Data Tracking

// AGENT PIPELINE

Intelligent Scanning, Every Hour

01

SCAN

Agents scan 200+ stocks every hour during market hours (9:30-16:00 ET) using the proven 150 SMA system. Only stocks above a rising 150-day average qualify.

02

SIGNAL

The CEO Agent merges Scout + WhatsHot data, applies market regime filters, and scores each setup. Only high-confidence signals above 65 points are sent.

03

TRACK

Every trade is logged, scored for R-multiple and execution quality, and fed back to the Stats Agent — improving signal accuracy over time.

ELO RANKING SYSTEM

Calibrated from your full trade history, then updated with every closed position.

HOW YOU CLIMB

+R x 100 pts — Profit in multiples of your stop

- + 10 pts — Followed your trade plan
- + 10 pts — Perfect entry timing
- + 5 pts — Clean exit at target

HOW YOU DEMOTE

-R x 100 pts — Loss in multiples of your stop

- 150 pts — EMOTIONAL trade penalty

FOMO / no stop / oversized position

ELO never drops below zero

RANK TIERS (promotion requires ELO threshold + 70%+ technical trades + positive avg R)

**BRONZE**

// QUICK START

Up and Running in 5 Minutes

1

INSTALL

Download and run the .exe installer. The app installs silently — no wizard needed. A shortcut appears on your Desktop automatically.

2

SETUP

The setup wizard opens on first launch. Enter your name and Anthropic API key. Telegram, NewsAPI, and Finnhub are optional but unlock full features.

3

CONNECT

Create a Telegram bot via @BotFather in 2 minutes. The app sends stop hits, target alerts, and approaching level warnings to your phone.

4

TRADE

Agents start scanning automatically every hour during US market hours. Add your open positions — P&L, ELO rank, and stats all update automatically.

AUTOMATIC UPDATES

One click — downloads in background, installs silently, relaunches. No manual reinstall. Your data is never touched.
